### **The anti spam solution at UMATES is SPAMfighter!**

UMATES produces carrying cases and accessories for laptops and is one of the leading manufacturers in the market – the products are sold worldwide. The company primarily communicates through email, so it is necessary to have a solution that filters spam from normal emails. It saves time and helps avoid virus, malware and other attacks. For maximum protection UMATES wanted a product that was reliable and with a high block rate.

UMATES receives over 20,000 emails per month. This shows how dependent UMATES is of their mail system and on avoiding attacks.

Instead of hiring a large IT department that would monitor all incoming mails and cost a lot of money, UMATES now have a fully reliable and cost-efficient system.

We were searching for a great anti spam product in the market with following requirements:

- Whitelisting/Blacklisting
- Community based filtering
- High block rate
- Local language
- Time saving

The choice was simple for us, as SPAMfighter had all these elements in their product.

After trying several anti spam solutions, UMATES agreed that SPAMfighter was the right solution; SPAMfighter meet their demands for efficiency, affordability and continuous updates, which are crucial in the fight against spam.

Jonas Beck, Market Development manager has the following comments:

“UMATES has chosen SPAMfighter because of its efficient anti spam and phishing filter that can be implemented as a plug-in for Outlook, Thunderbird or Windows Mail. All emails marked as spam automatically sorted into a spam folder. Another important reason was the unique SPAMfighter “community” in which the users can exchange information on emails and files that are not recognized by SPAMfighter. This allows these files to be added to the filter and from then on they will be recognized and moved.”

After UMATES integrated SPAMfighter to their system the employees saved about 15 minutes of their valuable time every day; not having to spend time sorting e-mails. And the risk of getting infected by virus, malware and other is a lot lower than it was before.

“To sum up we selected SPAMfighter instead of other providers because of the efficient filtering at a favorable price.”, Jonas Beck adds.
